

Installed Extensions

Applications Menu (/extension/6/applications-menu/) by [fmuellner](#)

([/accounts/profile/fmuellner](#))

System extension

Add a category-based menu for applications.

Auto Move Windows (/extension/16/auto-move-windows/) by [fmuellner](#)

([/accounts/profile/fmuellner](#))

System extension

Move applications to specific workspaces when they create windows.

Burn My Windows (/extension/4679/burn-my-windows/) by [Simme](#)

([/accounts/profile/Simme](#))

Disintegrate your windows with style.

Cosmic Dock

System extension

A dock for the Gnome Shell, default Pop!_OS experience. This extension is a modified version of Dash To Dock with different defaults. Dash To Dock can be installed to replace it and give more (but unsupported) configuration options.

Cosmic Workspaces

System extension

Bringing back vertically stacked workspaces

Desktop Icons NG (DING) (/extension/2087/desktop-icons-ng-ding/) by [rastersoft](#)

([/accounts/profile/rastersoft](#))

System extension

Adds icons to the desktop. Fork of the original Desktop Icons extension, with several enhancements .

**Espresso (/extension/4135/espresso/)** by [tharbold \(/accounts/profile/tharbold/\)](/accounts/profile/tharbold/)

Control when to disable the usual auto suspend and screensaver functionality and optionally Night Light as well. Options to show as an icon in the top panel, enable when a fullscreen app is running, restore state across reboots, provide notifications, enable when specific app are running, pause Night Light when Espresso is enabled or only when specific apps are running. Espresso also supports docking stations with options to enable when charging or when docked to external monitors.

**Launch new instance (/extension/600/launch-new-instance/)** by [fmuellner \(/accounts/profile/fmuellner/\)](/accounts/profile/fmuellner/)

System extension

Always launch a new instance when clicking in the dash or the application view.

**Lock Keys (/extension/36/lock-keys/)** by [kazimieras.vaina \(/accounts/profile/kazimieras.vaina/\)](/accounts/profile/kazimieras.vaina/)

Numlock & Capslock status on the panel. Gnome version 3.30 and earlier users please install 44 version of the extension
https://extensions.gnome.org/download-extension/lockkeys%40vaina.lt.shell-extension.zip?version_tag=26229

**Native Window Placement (/extension/18/native-window-placement/)** by [fmuellner \(/accounts/profile/fmuellner/\)](/accounts/profile/fmuellner/)

System extension

Arrange windows in overview in a more compact way.

**OpenWeather (/extension/750/openweather/)** by [skrewball \(/accounts/profile/skrewball/\)](/accounts/profile/skrewball/)

Display weather information for any location on Earth in the GNOME Shell

**Places Status Indicator (/extension/8/places-status-indicator/)** by [fmuellner \(/accounts/profile/fmuellner/\)](/accounts/profile/fmuellner/)

System extension

Add a menu for quickly navigating places in the system.

Pop COSMIC

System extension

Computer Operating System Main Interface Components

Pop Shell

System extension

Pop Shell

Removable Drive Menu (/extension/7/removable-drive-menu/) by [fmuellner](#)

([/accounts/profile/fmuellner](#))

System extension

A status menu for accessing and unmounting removable devices.

Screenshot Window Sizer (/extension/881/screenshot-window-sizer/) by

[fmuellner](#) ([/accounts/profile/fmuellner](#))

System extension

Resize windows for GNOME Software screenshots

Sound Input & Output Device Chooser (/extension/906/sound-output-device-chooser/)

by [kgshank](#) ([/accounts/profile/kgshank](#))

Shows a list of sound output and input devices (similar to gnome sound settings) in the status menu below the volume slider. Various active ports like HDMI , Speakers etc. of the same device are also displayed for selection. V20+ needs python as dependency. If you want to continue with the old method without Python, use options to switch off New Port identification. But it works with only English

system-monitor (/extension/120/system-monitor/) by [Cerin](#) ([/accounts/profile/Cerin](#))

Display system information in GNOME Shell status bar, such as memory, CPU, disk and battery usages, network rates...

System76 Power

System extension

☒ ON☐ OFF

System76 Power Management

Ubuntu AppIndicators (/extension/1301/ubuntu-appindicators/) by [didrocks](#)

([/accounts/profile/didrocks](#))

System extension

☒ ON☐ OFF

This is a mock extension. It does nothing if installed from extensions.gnome.org. Please use KStatusNotifierItem/AppIndicator Support which provides the same functionalities. This name is used to protect and reserve the name for ubuntu appindicator, available as a system extension on ubuntu. This allows us to not trump updates outside of our QA process via an external upload.

User Themes (/extension/19/user-themes/) by [fmuellner](#) ([/accounts/profile/fmuellner](#))

☐ ON☒ OFF

Load shell themes from user directory.

UTCClock (/extension/1183/utcclock/) by [injcristianrojas](#) ([/accounts/profile/injcristianrojas](#))

☐ ON☒ OFF

UTC clock for the top bar

Window List (/extension/602/window-list/) by [fmuellner](#) ([/accounts/profile/fmuellner](#))

System extension

☒ ON☐ OFF

Display a window list at the bottom of the screen.

windowNavigator (/extension/10/windownavigator/) by [fmuellner](#)

([/accounts/profile/fmuellner](#))

System extension

☒ ON☐ OFF

Allow keyboard selection of windows and workspaces in overlay mode.
<Ctrl>number selects a workspace, and <Alt>number selects a window.

Workspace Indicator (/extension/21/workspace-indicator/) by [fmuellner](#)

([/accounts/profile/fmuellner](#))

System extension

☒ ON☐ OFF

Put an indicator on the panel signaling in which workspace you are, and give you

Put an indicator on the panel signaling in which workspace you are, and give you the possibility of switching to another one.
